

# Math for Secondary Struggling Learners Manipulatives,

## Menus, Music, & Movement

This workshop will focus on how to help our secondary struggling learners in the area of Math. Students need hands on opportunities for learning through the use of manipulatives. They need all different learning strategies to fully experience Math and be able to internalize it. We will discuss use of real world experiences to make Math more practical to students. We will discuss Math journals and their use in the classroom for inclusion. We will use music, menus, manipulatives and movement to make all this happen.

**February 8, 2017**  
**Workshop #121628**  
**9am-4pm**  
**Free of Charge**
