

MAXIMIZE

LEARNING

FOR *homebound* STUDENTS

V·Go Ro·bots

v | gō | rō-bāt | ► n.

1. An innovative solution that allows students to attend classes via interactive video conferencing while recovering from long-term illness, injury, or other factors

WHY?

Homebound students will develop strong teacher and peer relationships, stay socially connected, and receive quality instruction without falling behind on coursework.

HOW?

From home, using a computer and mouse, a student can “drive” the robot to each of his classes. While in class, the student will be able to actively participate in lessons, discussions, and group work via video conferencing.

BENEFITS FOR THE DISTRICT

- **REDUCES** homebound teacher/tutor costs
- Receive potential **ADA INCOME** with the use of waivers (**in some cases**)
- Ensuring homebound students receive a **QUALITY EDUCATION**

VGo will be loaned at **NO COST** for members of the **iHD Digital Learning Package** on a first come first serve basis depending on availability.
